

DentaLab for QuickBooks Update Instructions

If you need assistance, or have any questions please contact Mainstreet at 215-256-4535

Please run the update on your server computer first. If you have not updated since before July 2010(DQB Version 1.23) you need to download and install the one time update on your server computer before running the DentaLab Update.

1. Point your web browser to <http://www.mainstreet-systems.com/>
2. Click **Support** from the menu at the top of our page
3. Click the **Quarterly Releases** link
4. Click the **DentaLab for QuickBooks Update** link, this link will also specify when the update was released, for example "DentaLab for QuickBooks Update October 2011"
5. Contact Mainstreet for the correct login information.
6. **Save** the update to a location you can easily access like your Desktop.
7. Close all components used by DentaLab, including DentaLab itself QuickBooks can remain open.

- a. Remote Connector(server only, versions 1.27 and earlier)

- i. Right click, click show, click the exit button in the middle of the window.

- b. Remote Connector(server only, versions 1.28 and later)

- i. Right click, click exit.

- c. Notificator(server only)

- i. Right click, click exit.

8. Run the **update by double clicking**. Follow the instructions on screen, if you have any questions please contact DentaLab Support.
9. After running the update, **before you click Finish** see that every step is followed by the word Done. If any steps don't say Done or a message is shown forward this text to Mainstreet and we can tell you what is preventing the update.
10. Start the remote connector by going to Start > All Programs > Startup > MSSl Remote Connector
11. Start the Notificator(if it was running previously) by going to Start > All Programs > Startup > Notificator

After your server computer is updated follow these same steps on client computers.
